Specialty Polymer Coatings, Inc. ("SPC") is the leading North American formulator, manufacturer and supplier of "state of the art" **100% solids (no VOC's)** liquid epoxy and polyurethane coatings.

In the **Pipeline Industry**, SPC products have become the "standard" liquid corrosion protection coating. Some recent projects include:

- **Alliance Pipeline Project**
- **Corridor Pipeline Project**
- **Maritimes & Northeast Pipeline Project**
- **Southern Crossing Pipeline Project**
- **Vector Pipeline Project**
- **Yucatan Peninsula Gas Pipeline Project**
- **Plus many other Domestic and International Projects**

Pipeline uses included:

- **Coating of Valves, Fittings, Fabricated Assemblies and Pipe**
- **Coating of Girth Welds**
- **Coating of Pipe for Slip Bore / Directional Drilling and Road Crossings**

Specialty Polymer Coatings, Inc.'s products have also become the premier coating system for **Pipeline Coating Rehabilitation Programs**. In excess of 300 miles of large diameter pipeline have been recoated with SPC systems. This has included brush / roller application, plural component hand spray and automated line travel spray, both in and out of the ditch. In addition, SPC products are employed as repair coatings on investigative digs for corrosion and SCC.

SPC coating systems are rated for in-service temperatures up to **248°F (120°C)** and are available in spray and brush grades, as well as cartridges for holiday repair.
